

RAISNEWS

..... a caring community

"Devote yourselves to prayer, being watchful and thankful."

- Colossians 4:2

K3A finished first quarter with flying color! We have adjusted well into the new classroom, teachers, and schedule. We may face some difficulties at the beginning such as eating vegetables and waking up early to come to school on time. But day by day we improved. Now we know words such as healthy food, punctuality, independent, sharing, hardworking and good choices. Thank you RAIS for allowing us to experience the great school life!

SUPERHERO SCIENTIST FOLLOW THE RULES

Safety is an important concern in all laboratory activities. Teaching the students the importance of Laboratory Safety was designed to provide a sense of personal security and awareness.

As a Superhero Scientist,

Quietly enter the Science Lab Center, remember to follow the rules.

Lab works is awesome, but always use caution w/ chemicals, burners & tools.

You'll be given a pair of goggles to wear, plus gloves, a lab coat or apron.

As you measure & pour always be sure to wipe away spills at your station

You may whip up a brew of some glop pity geo, never act on the foolish notion of tasting the stuff-you may go belly up! It might be a poisonous potion.

If you make a mistake & a breaker should break, bring it straight to your teacher's attention.

But don't mess around or you may be found on the receiving end of a detention.

What a Success! You've proven your test, time to put your equipment away.

Wash your hands, now you're through.

If I want to save the world, I have to save myself.
