"The reward of a work is to have produced it; the reward of effort is to have grown by it".—Antonin Sertillanges

Chinese Chapel Program

Chinese is a new subject to the curriculum of RAIS for 2 years for Grades 1-7 and grade 11 & 12. This is the first time a chapel program was organized by the Chinese department. During the chapel program of elementary section, grade 1-2 read the Tang poetry that was written in the 1300s. Grade 1-2 also sang the Chinese song, "Two Tiger". This was followed by dances from selected grade 7 students and grade 11-12. The Tang poetry was to tell about the history of Chinese literature and the dance was an entertaining performance of the modern age. In the middle school section chapel program, there was an addition of grade 6 reading a story in Chinese. In the chapel program of high school section, there was an addition of selected grade 12 students singing the Chinese song. The chapel program was a success in showing the improvement of the RAIS students in accepting and understanding the Chinese language. Chinese is a must learn language from now on in to the future. I would like to thank the performers for their time and dedication to Chinese, and their parents for their time to see their children perform. This really shows the support given to the Chinese department. Special thanks to Elementary Section Head, Mrs. Sophia, for giving me the free space to show my creativity in the chapel program.

English Literacy Week

English Literacy Week is one of the most important school activities for the EFL Department. In this week long activity, students need to take part and be able to showcase their skills and talent using the English Language. Through the help, guidance and support of all EFL Teachers, EFL 1 and 2 was able to participate in the Read Out Loud Competition. EFL 3 had discussed about the English Literacy Week theme which is: Inspire English : Empowering Global Citizens in a Digital Age through a PowerPoint Presentation. EFL 4 on the other hand had presented their movie review about the movie of their choice. This school activity had been of great help in refining not only the English speaking skills of our students but boosting their confidence as well.

Mrs Emelda C. Ablao

EFL 4 Homeroom Teacher

The Information and Communications Technology (ICT) Day on March 25, 2019 was as awesome experience for the RAIS administrators, faculty, staff and students. The theme for this year was “Connecting Lessons to Life” “Rise of the Augmented Reality”. What is augmented reality? It is a subset of virtual reality that’s catching on quickly with app developers in business and gaming alike. It is also the use of modern technological advances to superimpose images, data, sound and information onto the world we see.

The whole Building C auditorium was separated into 3 Different Kinds of Booths such as Educational, Entertainment and Exhibits. The Pre-school students had a wonderful experience in the 3D Film Showing. The lower grade students enjoyed seeing their colored worksheets in 3D from the Quiver Education and for some they get to exercise their body from the Just Dance Now booth.

A period visit to the booths was indeed an amazing experience for the teachers and students to get entertained and learn about math, science, literacy, geography, history, art and creativity through modern technologies.
